Dear Health Care Provider:

Your patient is a CUA nursing student. In order for a student to practice in a clinical setting as part of their nursing education, we require:

- (a) A completed health form from a health care provider (with a review of immunizations).
- (b) A 9 panel urine drug screen (*THC, Cocaine, PCP, Opiates, Methamphetamines, Methadone, Amphetamines, Barbiturates, Benzodiazepines*) via CertifiedBackground.com.
- (c) CPR certification (American Red Cross or American Heart Association; no on-line CPR courses; must include infants, children and 2 man CPR).
- (d) An annual PPD.
- (e) Completion of an *annual* clinical readiness form that identifies any health related conditions that may impact on the students' ability to work in the clinical setting. Students may be placed in medical, surgical, pediatric, obstetric, and psychiatric settings. Health clearance and information concerning their health status is required.

Thank you very much for your kind assistance.

Sincerely,

A handwritten signature in cursive script that reads 'Patricia C. McMullen'.

Patricia McMullen, PhD, JD, CRNP
Dean, School of Nursing
